EDUCATION	M.S. Computer Science , with a focus in Human-Computer Interaction, expected May 2021 Virginia Tech, Blacksburg, VA <i>Committee:</i> Dr. Kurt Luther (Advisor/Chair), Dr. Andrea Kavanaugh, Dr. Chris North <i>Courses:</i> Models & Theories of HCI, Software Engineering, Advanced Machine Learning, Research Methods in CS, User Interface Design, Adv. Topics in HCI: Participatory Wellbeing of Underserved Communities				
	B.S. Computer Science , Virginia Tech, Blacksburg VA Minors in Industrial Design and French GPA: 3.65/4.0 – Magna Cum Laude Honors Graduate – Dean’s List all semesters				May 2019
SKILLS	Software:		Programming Languages:		Languages:
	Eclipse Matlab Visual Studio Autodesk Inventor	Linux/UNIX Snap! AWS RDS Balsamiq	Java (Advanced) C (Advanced) HTML (Advanced) CSS (Advanced) JavaScript (Novice)	PHP (Novice) MySQL (Novice) Go lang (Novice) Python (Novice)	English (Native) French (Native) Arabic (Native) Spanish (Conversational)
EXPERIENCE	Crowd Intelligence Lab at Virginia Tech				
	Graduate Research Assistant – CrowdTrace Project				August 2019 – August 2020
	<i>Advisors:</i> Dr. Tianyi Li, Dr. Kurt Luther, Dr. Chris North				
	- Assist in design, implementation, and evaluation of <i>CrowdTrace</i> system for visualization of provenance in distributed sensemaking. - Assist in data analysis and synthesis of quantitative and qualitative data from evaluative usability studies and surveys.				
	Virginia Polytechnic Institute and State University (Virginia Tech)				
	Graduate Teaching Assistant				August 2019 – May 2020
	CS 3744: Introduction to Graphical User Interfaces and Graphics.				
	SAP Concur				
	Full-Stack Software Design Engineering Intern				June 2019 – August 2019
	- Design a micro-service to fulfill the GSA City Pair Program’s testing requirement as part of the Govt. R&D team. The design incorporated AWS RDS’ MySQL service using Golang and proved to provide a more resilient and flexible system design for data storage and data generation, as well as more flexibility for testing, data visualization and result reporting. - Implement the micro-service which improved testing performance (100 tests/week to 50 tests/hour). The micro-service portability permits it to be migrated commercial team projects as well.				
Materials and Design Lab (MaD Lab)					
Undergraduate Research Assistant – Tooling Bamboo Growth Project				January 2019 – May 2019	
<i>Advisors:</i> Prof. Jonas Hauptman (College of Architecture and Urban Studies, Virginia Tech)					
- Design system wireframes for CNC machine tailored to Bamboo. Schematics include 4-axes in addition to a mirrored y-axis and supported by LinuxCNC (MachineKit) and BeagleBone boards. - Research user interface alternatives for MachineKit to enable customization of controls for the Bamboo CNC machine.					
syNeRGy Lab at Virginia Tech					
Undergraduate Researcher - Parallel Programming with Pictures Project				April 2017-May 2018	
<i>Advisor:</i> Dr. Wu Feng					
- Assemble generalized modules to teach “parallel programming with pictures” for relevant pedagogical venues, e.g., CS 2104, Let’s Code Blacksburg, and so on. Modules engage students to work with serial and parallel computing concepts and interact with the block-based language “Snap!” - Participate in Women in Computing Day by assisting, tutoring, and walking through the “parallel programming with pictures” modules with the attendees					
AWARDS & ACTIVITIES	VTURCS Capstone Award (2 nd Place) – Accessibility @ VT				Spring 2019
	Vice President of Salsa Tech at Virginia Tech				Spring 2016 – Fall 2018
	Peer Leader at the Residential Leadership Community at Virginia Tech				Fall 2015 – Spring 2017
